Bath, Somerset

United Kingdom

Summary

- Over 13 years in software development
- Strong knowledge of OOP, SOLID, DDD, Solution design, Design and Architecture patterns, API design
- Technologies:
 - JS (TypeScript, NodeJS, React, [Nest.js](#), Vite) - 5 years
 - PHP (Symfony, Yii) 10 years
 - Go (actively learning) less than year
 - MySQL, PGSQL, Redis, RabbitMQ, MongoDB, Elasticsearch, Websockets, Kafka - 7 years
 - Docker, Kubernetes, AWS, GCP - 5 years
 - Grafana, StatsD, Prometheus, Open telemetry, Datadog - 8 years
 - AI: Cursor, AWS Bedrock, etc - 2 years
- Domain expertise: marketing, e-commerce, bookings software, payments, video streaming, Content management systems, AI driven features
- Soft skills: Self motivated, result oriented, prefer systematic approach

Professional Experience

Principal Engineer(Tech lead, Engineering manager) in Expedition Software(former Regiondo, Booking software, b2b) - 3 years (November 2023 - Present time)

- tech stack: nodejs, php7-8, symfony reactjs, nestjs, aws, kubernetes, pgsql
- leading and mentoring three different teams and 5 workstreams
- engineers management and recruiting
- solution design
- substitute Engineering manager and Project manager role for some of workstreams
- cross-timezone communication (we have offices in CA and AU together with EU)

Achievements: facilitated and shipped three large streams(SSO, Ticketing, Booking management), increased teams productivity, established design first approach

Senior Software Engineer in Regiondo(Booking software, b2b) - 1 year (March 2022 - November 2023)

- php7-8, symfony, nodejs, reactjs, nestjs, aws, kubernetes, pgsql
- developing cloud-compatible microservices to substitute old platform (php, nodejs, reactjs, event-sourcing)
- mentoring team on symfony topics

Achievements: learned ReactJS and build checkout testing tool

Project Team lead(Tech lead, Engineering manager) in NDA company (gambling) November 2021 - March 2022

- php7, symfony, mysql, redis, rabbitmq, gcp, docker, kubernetes
- cross-functional team management (front & back-end, qa teams - 17 people)

- project technical improvement

Achievements: kept two team-leads from leaving the company

Backend Core Team Lead(Tech lead, Engineering manager) at Evolpay Entertainment - 1.5 year (June 2020 - November 2021)

- php7, swoole, nodejs, symfony, mysql, redis, rabbitmq, aws, docker, kubernetes
- legacy monolith support
- design and implementation of new services

Achievements: designed and deployed 10 cloud native, scalable and 100% covered with tests services (including two nodejs) and technical documentation; hired team of four people

Senior software engineer at Witty Tech (fintech) June 2020 - November 2021

- php7, java, symfony, spring, mysql, docker
- technical review and documentation of existing projects (with C4 model approach)
- design and implementation of authentication service with Face ID identification

Software engineer \ Team lead(Tech lead, Engineering manager) at Aurora global - 7 years (September 2012 - April 2020)

Project: Video streaming interactive platform - Team lead(Tech lead, Engineering manager) (~ 5 years)

- php5-7, yii, mysql, memcache, redis, rabbitmq, elasticsearch
- task analysis and decomposition
- project performance optimization
- cross-functional team management (front & back-end, qa teams - 17 people)

Achievements: front & back-end teams formation from full-stack; decrease new features time to market(huge project refactoring and workflow optimization), load time improvements from 2000+ to 600ms avg; created a/b testing tools and culture

Project: Video on demand platform - software engineer \ Team lead(Tech lead, Engineering manager) (~1 year)

- php5-7, yii, mysql, memcache, redis, rabbitmq, elasticsearch
- development of new functionality
- project performance optimization
- one developer mentoring

Project: Social network (dating) - software engineer (~1 year)

- legacy monolith support

System administrator \ Software engineer at UMH Radiogroup (June 2009 - September 2012)

Technical engineer at Sedna S (August 2008 - June 2009)

Education

Computer science and networks security in National Aviation University, bachelor.
